Skills

Android Development • Web Development • Java • Object-Oriented Programming (OOP) • JavaScript • SQL • HTML • CSS • Swing • NodeJs

Projects

ARSHB

Summary:

ARSHB is a multi-level android app where hotel owners can showcase their hotels and customers can book the hotels which are signed up in the app. Customers can find hotels using the Google Maps API. Customers can save their favorite hotels and can save hotels for later watching. Customers can review and comment on the hotel they have booked or stayed at least once. Moreover, customers will be notified about their upcoming orders, one day before the booking date.

Hotel Management

        Summary:

        Hotel management is a desktop/laptop-based software. It was built using the theme of a Kdrama named "Hotel Del Luna". Slight modifications of this software will make it useable by all the hotels.
